

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

PALLADIUM FCP CRESCITA PROTETTA I CAP (EUR) ISIN: LU1275303607

This Fund is managed by Mediobanca Management Company SA

Objectives and Investment Policy

The Sub-Fund seeks to achieve capital appreciation whilst offering a protection equal to the maximum between 80% of the initial NAV and 80% of the highest Basket Portfolio value ever achieved (from the launch of the Sub-Fund onwards). The Sub-Fund gives exposure to the performance of a Basket Portfolio consisting of:

- a portfolio of securities and other assets whose composition is determined from time to time by the Management Company (the "Assets Component") and
- an exposure to an effective overnight interest rate for the Euro (the "Cash Component"), allocated in accordance with a volatility control strategy. The overnight interest rate used for the Cash Component will be the Effective Overnight Index Average Eonia minus a fixed spread.

Assets Component and Cash Component are rebalanced with the aim to control the volatility risk of the Basket Portfolio, such that the expected annualised realised volatility of the Basket Portfolio is equal to around, or below, 8% per annum.

The Sub-Fund may gain exposure to the Assets Component and the Cash Component through a total return swap with an approved counterparty (The "Basket Portfolio Total Return Swap"). The Maturity Date will be the expiry date of the put option that delivers the protection, which is initially equal to three years from launch. The Sub-Fund will endeavor to extend the maturity at least once a year and, if the put option can no longer be extended, the Shareholders will be informed about the expected Maturity Date at least 3 months prior to such date, and on such date ("Maturity Date") the fund will be terminated. The Assets Component consists of a portfolio with exposure to equities, bonds, commodities, and other assets listed or traded on the markets in North America and Europe either via direct investments in securities or, indirectly, via total return swaps, futures, options and forwards.

The Sub-Fund may invest in financial derivative instruments ("FDI") transactions for investment and efficient portfolio management, which may be either exchange traded or over-the-counter ("OTC"), in swaps, options, futures and forward currency exchange contracts. The Sub-Fund may also enter into repurchase/reverse repurchase arrangements.

The protection offered is under the form of a Put Option and there is no additional formal guarantee to ensure the contemplated protection. The protection will start after the ramp-up period which will terminate on 16th March 2016. From the launch of the Sub-Fund and before this date the Sub-Fund will be invested mainly in short-term money market and debt instruments denominated in Euro and issued by public authorities having a high average credit rating ("Investment Grade") and cash and cash equivalent.

The Sub-Fund is open-ended which means that it may, at any business day on the request of the unitholders, redeem its units at prices based on the applicable net asset value per unit.

Income arising from the Sub-Fund is being reinvested.

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money in the short-medium term (2-4 years).

The Net Asset Value ("NAV") of the Sub-Fund will be determined on each Business Day in Luxembourg ("Valuation Day"). The redemption requests will be closed at 4.00 p.m. CET ("cut off time") in Luxembourg on the Business Day preceding the relevant Valuation Day.

Minimum Initial Investment: 10 000 EUR.

Minimum Subsequent Investment: None.

The Sub-Fund is denominated in EUR.

Risk and Reward Profile

This risk indicator is calculated using historical data, which cannot be used as a prediction for the future risk profile of the Sub-Fund. Therefore, the risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Sub-Fund may shift over time.

Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

At this time, the level of the risk and reward profile is equal to 3, due to the medium volatility of the markets and instruments in which the Sub-Fund invests.

The risk and reward profile does not take into consideration the following risks, which can affect the Fund:

- credit risk: which are linked to the debt securities the Sub-Fund invests in;

- operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud;
- counterparty risk: which may occur due to the fact that the fund might have exposure through contract with third parties;
- liquidity risk: which may occur due to the fact that the level of investments is made in financial instruments that could have a low level of liquidity in some extraordinary circumstances for example in the case of market crash and default of debt claims on issuers side; and
- risks linked to the investment in financial derivatives, i.e. the risk that variations in the market prices of the underlying instruments may be magnified in terms of profits and losses for the Sub-Fund (leverage).

For more detailed information on the risks associated with an investment in the Sub-Fund, please refer to the section in the Prospectus entitled "Risk Factors" and discuss with your professional advisers.
