What is this product?

Type

This product is an investment fund.

Objectives

Investment objective The Sub-Fund seeks to achieve capital appreciation whilst offering a protection equal to at least 90% of the highest NAV reached in the last twelve months rolling after 15 January 2021 (the "Protected NAV").

Investment policies In case the Net Asset Value decreases to the Protected NAV, the Net Asset Value might decrease further in the following days by the daily accruing of pro rata fees to a maximum amount equal to the annual fees, as defined in section 8 of the prospectus in part B chapter I. This means that investors will not lose more than 10% before fees are deducted. The Sub-Fund gives exposure to the performance of a multi-asset basket (the "Basket Portfolio") consisting of:

a portfolio of securities and other assets whose composition is determined from time to time by the Management Company (the "Assets Component") and

an exposure to an effective overnight interest rate for the Euro (the "Cash Component"), allocated in accordance with a volatility control strategy. The overnight interest rate used for the Cash Component will be the Effective Overnight Index Average Eonia minus a fixed spread.

Assets Component and Cash Component are rebalanced with the aim to control the volatility risk of the Basket Portfolio. The Assets Component consists of a portfolio with exposure to equities, bonds, commodities, and other assets, including Exchange Traded Funds (ETFs) that are listed or traded mainly on the markets in North America and Europe. The composition of the Assets Component and the weight between the Assets Component and the Cash Component is determined from time to time by the Investment Manager using systematic mechanisms and discretionary investment choices in order to maintain a volatility of the Basket Portfolio up to 10.00% p.a. The Sub-Fund will gain exposure to the Basket Portfolio which consists of the Assets Component and the Cash Component indirectly through one or more TRS with an Approved Counterparty. The monthly performance of the Basket Portfolio might be limited at 5.0% ("Capped Performance Level") of the level of the Basket Portfolio on the last Business Day of the previous month, as determined from time to time by the Investment Manager.

Total return swaps are entered into for investment purposes only.

The protection offered is under the form of a Put Option and there is no additional formal guarantee to ensure the contemplated protection. The Sub-Fund will terminate on the Business Day following the expiry of the put option ("Maturity Date") that provided the protection. The Sub-Fund will endeavor to extend the maturity of the put option periodically. If the put option can no longer be extended, the Unit Holders will be informed

about the expected Maturity Date of the Sub-Fund (at least three (3) months prior to such date).

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money in the short/medium term (2-4 years).

Minimum Initial Investment: 10 000 EUR.

Minimum Subsequent Investment: None.

The Sub-Fund is denominated in EUR.

Benchmark uses The Fund is actively managed without reference to any benchmark.

Redemption and Dealing The Sub-Fund is open-ended which means that it may, at any business day on the request of the unitholders, redeem its units at prices based on the applicable net asset value per unit.

The Net Asset Value ("NAV") of the Sub-Fund will be determined on each Business Day in Luxembourg ("Valuation Day"). The redemption requests will be closed at 4.00 p.m. CET ("cut off time") in Luxembourg on the Business Day preceding the relevant Valuation Day.

Distribution Policy Income arising from the Sub-Fund is being reinvested.

Intended institutional investor

This Fund is suitable for institutional investors who can accept medium term losses. This Fund may not be appropriate for investors who plan to withdraw their money within 4 years. The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

What happens if Mediobanca Management Company SA. is unable to pay out?

The investment objective of the Sub-Fund is to achieve capital appreciation whilst offering a protection, through a put option with Morgan Stanley as counterparty, to at least 90% of the highest Net Asset Value reached in the twelve (12) months rolling after 15 January 2021 (the "Protected NAV"). The protection does not foresee any derogation.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.
