## What is this product?

### Type

This product is an investment fund.

### Objectives

**Investment objective** The Fund seeks to produce positive returns from a diverse portfolio of developed market European credit positions generated from a combination of interest received and trading gains.

**Investment policies** The Fund will adopt a highly flexible approach allowing the investment manager to allocate capital across a number of sectors of the credit market (each an "Asset Class"), each being managed by dedicated portfolio management and research teams. The initial Asset Classes are Financials, Corporates, Asset-Backed Securities ("ABS") and Special Opportunities. The Fund may invest in a wide variety of credit instruments including bonds, notes, convertible bonds and/or hybrid capital instruments (such as contingent convertible instruments ("CoCos")) and structured credit instruments including collateralised loan obligations ("CLOs") and ABS (including consumer ABS, residential mortgage backed securities ("RMBS") and commercial mortgage backed securities ("CMBS")). The Fund may use derivative instruments such as options, single name or index credit default swaps ("CDS"), total return swaps ("TRS") and forwards for investment purposes or to optimise or reduce exposure in conjunction with the investment manager's view.

The Fund will aim to be diversified in terms of industry, geographic region, sector and rating. The Fund will not invest in assets with a credit rating of CCC or below.

Unitholders may request the conversion of their units to units in another class of units of the Fund.

Recommendation: The Fund may not be appropriate for investors who plan to withdraw their money in the short/medium term. A typical investor has an investment horizon of 2-3 years or more.

Minimum Initial Investment: 100,000 EUR.

Minimum Subsequent Investment: 100,000 EUR.

The Fund is denominated in EUR.

**Benchmark uses** The Fund is actively managed without reference to any benchmark.

**Redemption and Dealing** The Fund is open-ended which means that unitholders may request to redeem their units in the Fund on any business day at prices based on the applicable net asset value per unit.

The net asset value of the Fund will be determined on each business day on which banks are open for business simultaneously in Luxembourg and London except for 24 and 31 December. Redemption requests will be closed at 12.00 p.m. on the business day preceding the relevant valuation day.

**Derivative Policy** The credit instruments listed above may embed financial derivatives and/or structural leverage.

While both long and short positions may be employed, it is expected that the portfolio will be predominantly long. Foreign exchange and interest rate exposures resulting from the credit instruments listed above will be hedged through the use of financial derivatives.

**Distribution Policy** The income, earnings and gains of the Fund will be capitalised and reinvested on behalf of unitholders.

### Intended institutional investor

This Fund is suitable for institutional investors who can accept short term losses. This Fund may not be appropriate for investors who plan to withdraw their money within 3 years. The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

### Terms of the PRIIP

There is no maturity date on this Product. The manufacturer is entitled to terminate the PRIIP unilaterally under the specific circumstances foreseen by the applicable law.

## What are the risks and what could I get in return?

### Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of Mediobanca Management Company SA. to pay you.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.mediobancamanagementcompany.com/en/palladium-fcp>

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between 2021 and 2022.

**Moderate:** this type of scenario occurred for an investment between 2014 and 2017.

**Favourable:** this type of scenario occurred for an investment between 2012 and 2015.

### What happens if Mediobanca Management Company SA. is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to BNP depository of the Fund responsible for the safekeeping of the assets of the Fund (the "Depository"), there is a potential default risk if the assets of the Fund held with the Depository are lost. However, such default risk is limited due to the segregation of assets between those of the Depository and the Fund. The Depository is liable to the Fund or to the investors of the Fund for the loss by the Depository or one of its delegates of a financial instrument held in custody unless the Depository is able to prove that the loss has arisen as a result of an external event beyond its reasonable control. For all other losses, the Depository is liable in case of its negligent or intention failure to properly fulfil its obligations pursuant to the UCITS Law and any applicable rules and regulations.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	163 EUR	547 EUR
Annual cost impact*	1.6%	1.7%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 3.2% after costs.
